Drug/Alcohol Policy

POLICY NO: HR630
EFFECTIVE: 8/1/2023
SUPERSEDES: 7/19/2016

Purpose
To establish a policy that describes the Company’s expectations regarding alcohol, Cannabis, and Illegal Drugs in the workplace. This policy is based on the belief that a working environment free of drug and alcohol abuse is healthier, safer and more productive for all Employees.

Scope
This policy applies to all Land O’Lakes Employees (including interns and temporary workers) (“Employees”) and all Land O’Lakes facilities and businesses. This policy does not address Department of Transportation (DOT) regulated Employees when a drug or alcohol testing situation falls within DOT’s mandatory testing regulations. At all other times, this policy applies to DOT regulated employees. To the extent any provisions of this policy conflict with a Collective Bargaining Agreement, the conflicting CBA provision shall control.

Definitions
• Illegal Drugs includes:
  o all forms of narcotics, depressants, stimulants, hallucinogens, or other drugs, whose use, possession or transfer is restricted or prohibited by federal, state, or local law, excluding Cannabis (defined below);
  o prescription drugs or over-the-counter medications not used in accordance with product and/or physician instructions or pursuant to a valid prescription;
  o prescription drugs or over-the-counter medications that impair the Employee’s ability to perform their work safely.
• Cannabis includes the cannabis flower, cannabis products, lower-potency hemp edibles, and hemp-derived consumer products.
• Employee includes all Land O’Lakes employees, including temporary workers, interns, and DOT regulated drivers in situations not covered by DOT testing regulations. “Employee” does not include unemancipated minors under the age of 18, who fall outside the scope of this policy and are not subject to drug testing.
• Positive Test shall mean the following: for alcohol, a confirmed blood alcohol test or, where and as permitted by law, a breathalyzer test, with a result of .02\(^1\) or higher, or its equivalent; for Illegal Drugs and Cannabis, a test confirmed as positive using a laboratory and method of analysis that meets or exceeds those of Minnesota Statute 181.953, or for employees tested in Iowa, the result must be .04 or higher, expressed in terms of grams of alcohol per two hundred ten liters of breath, or its equivalent, in accordance with Iowa law.

---

\(^1\) In Iowa, the result must be .04 or higher, expressed in terms of grams of alcohol per two hundred ten liters of breath, or its equivalent, in accordance with Iowa law.
in Iowa, a laboratory that meets all requirements of Iowa Code Section 730.5, including the use of breathalyzer equipment and personnel that meet the requirements of regulations adopted by the United States Department of Transportation for alcohol testing under the federal Omnibus Transportation Employee Testing Act of 1991.

- **Significant Damage** means damage to physical property or product, the value of which, or cost to repair, is equal to or greater than $1,000.
- **Supervisor** shall mean a Salaried Employee or Hourly Lead Person overseeing the work of other Employees.

**Policy**

*In all cases, this policy shall be administered in accordance with applicable law.*

It is Land O’Lakes’ policy to maintain a safe workplace where employees are not under the influence and/or impaired by drugs or alcohol. While on Company time, Company premises or operating or traveling in company owned or operated vehicles or equipment, Employees may never use, sell, purchase, transfer, manufacture or possess Cannabis, Illegal Drugs or drug paraphernalia. All Employees are expected to come to work free of the presence or effects of chemicals or substances that may impair the ability to work in a safe and productive manner.

This policy extends to Cannabis and cannabis products including but not limited to hash oils, vapes, pills, gummies, infused drinks and foods. Employees are advised that Land O’Lakes is a federal contractor, and the federal government still classifies Cannabis as an illegal drug. Further, this policy still applies and will be enforced even in states where use or possession of Cannabis is lawful in some circumstances and/or is allowed for medical purposes. Medical accommodation requests are to be reviewed by human resources.

Employees may not possess, serve, consume, or be under the influence of alcohol while operating Company-owned-or-leased equipment or vehicles. For purposes of this policy, to “be under the influence” of alcohol means where such influence may impair safe and productive work performance. Except as noted below, Employees may not possess, serve, consume, or be under the influence of alcohol while on Company premises or when conducting Company business. Employees with safety-sensitive positions may not consume any amount of alcohol within four (4) hours before the time they are scheduled to report to work or during any work period, including meal and rest breaks.

Alcohol may only be served and consumed at functions on Company premises if authorized by the Chief Human Resources Officer and the General Counsel. Cannabis and Illegal Drugs are never permitted to be possessed, served, or consumed on Company premises or at company functions. Alcohol may be served and consumed at external events where Employees are representing Land O’Lakes. Alcohol should only be served by a person (or entity) that is licensed and trained to serve alcohol. Alcohol may never be served to any person under legal age or to any person who is obviously intoxicated. Consumption at any such event by Employees of legal age is completely voluntary and should always be in moderation and never in a manner that would embarrass the Company or harm the Company’s reputation.
Testing:
Drug and alcohol testing supports the Company’s efforts to maintain a safe workplace that is free of unlawful drugs and free of use of any drugs or alcohol that impair work performance. All drug and alcohol testing will be conducted in conformance with applicable law and may be modified as necessary to conform to applicable law.

Employees: Employees are subject to drug, Cannabis and/or alcohol testing under any of the following circumstances:

1. **Reasonable Suspicion**: If a supervisor has reasonable suspicion that the Employee is currently in violation of this policy, the Employee may be asked to submit to a reasonable suspicion drug, Cannabis and/or alcohol test. “Reasonable suspicion” will be based upon specific observations and facts and reasonable inferences drawn from them that the individual may have violated this policy. The Supervisor’s determination will be reviewed with another management representative unless circumstances reasonably prevent such review. An Employee referred for reasonable suspicion testing will be removed from his or her position and suspended pending the results of the test.

2. **Accident/Injury**: When a violation of this policy may have been a contributing factor in an on-the-job accident that results in either an injury requiring any individual to seek medical treatment beyond first aid from a health care professional or in Significant Damage to property or equipment, then the Employee reasonably suspected of violating the policy will be required to submit to reasonable suspicion testing and will be removed from his or her position and suspended pending the result of the test.

3. **Return-to-Work**: If the Employee returns to duty after completion of an accredited substance abuse treatment program as described below, he or she will be subject to a return to work drug, Cannabis and/or alcohol test, and may be subject to unannounced follow-up testing for at least twelve (12) months and no more than twenty-four (24) months following completion of the program.

4. **Random Testing for Safety Sensitive Roles**: If Employees work at a Company facility that manufactures hazardous materials (HAZMAT) and the facility has the authority from Human Resources, the Safety-Sensitive Employees at that specific facility may be subject to random testing, including Cannabis testing.

Applicants: Applicants for positions subject to Department of Transportation drug testing regulations will be tested in accordance with such regulations.

Other: In addition to any other testing specifically described in this policy, the Company will conduct testing when required or permitted by government statute or regulation.

Testing Outcomes:

**Refusal to Test**: Employees who refuse a drug or alcohol test under this policy will be terminated.

**Right to Receive Test Results**: Employees have the right to request and receive from the Company a copy of a test result report.
Inconclusive or Diluted Tests: In the event any test result is inconclusive, Employees may be required to submit to an unannounced retest as soon as reasonably practicable after the inconclusive results are obtained. A second inconclusive result will result in termination except where limited by law. In the event a test result is diluted, the individual will be subject to an unannounced retest as soon as reasonably practicable after the diluted results are obtained. If the individual cannot produce a non-diluted sample in two attempts, and there is no documented medical reason for the diluted sample, it will be treated as a refusal to test.

Tampering/Adulteration/Other: In all cases, tampering with or adulterating a test specimen, taking any action to circumvent or avoid testing authorized by this policy, failing to cooperate with the investigation of a violation of this policy, and/or refusal or failure to comply with conditions imposed by corrective action will be grounds for termination of current employment.

Negative Tests: An Employee who was suspended pending test results and who receives a negative test result will be returned to work as soon as possible. The Employee may be paid for the time spent while on suspension unless suspension without pay is appropriate under another Company policy.

Positive Tests: Any Employee who tests positive for Illegal Drugs, Cannabis or alcohol may present information to a Medical Review Officer challenging or explaining the test results. If the test results could be explained by the use of a prescription drug or over-the-counter medication, the Employee will be asked to provide documentation considered sufficient by the Medical Review Officer, such as a doctor’s note stating that the Employee has a valid prescription, is taking the drug in accordance with the prescription and is able to safely perform all of the assigned job functions while taking the drug. The Medical Review Officer has the authority to convert a Positive Test result into a negative one.

If an initial drug test or Cannabis test is positive, and no information is presented to the Medical Review Officer that would warrant reversing the test result, those who test positive will be offered the opportunity to have a confirmatory retest, at their own expense. A confirmatory retest must be requested within seven (7) days of being notified of the Positive Test result and must be conducted either at the same laboratory that conducted the first test, or another laboratory that

\[2\] In Iowa, employees have fifteen (15) calendar days to request a retest. Details will be provided to the employee when notice of the positive drug test is provided.
carries the same testing credentials. If the confirmatory retest does not confirm the Positive Test, it will be handled as though the initial test results were negative.

If a confirmatory retest is not requested, or if a confirmatory retest confirms the initial test, the consequences are as follows:

Employees who test positive for presence of illegal drugs and/or impairing drugs are subject to immediate termination, except where such termination would be prohibited by an applicable law of the state where the employee works. In those states, (such as Minnesota and Iowa), employees will be required to complete a substance abuse evaluation and comply with any resulting recommended counseling and/or treatment. If the Employees successfully complies with and completes the recommended rehabilitation, no further action will be taken based on the positive test. If the Employee does not comply with the recommended plan, the Employee will be terminated from employment. If the Employee tests positive a second time, regardless of how much time has passed since the first positive test, the Employee will be terminated.

Nothing in this policy limits the right of the Company to discipline or discharge an employee on grounds other than a Positive Test result, including for use, sale, purchase, transfer, manufacture or possession of Illegal Drugs or Cannabis on Company time, Company premises, or while operating Company owned-or-operated equipment or vehicles, or for other violation of this Policy.

Employees may be suspended following notice of a Positive Test result while a decision is made as to continued employment.

There is no other appeal for the consequences of a Positive Test result other than those described in this Policy.

Other important information:

**Confidentiality:** Test results and other information acquired in the testing process are considered confidential information. The Employee will be provided with copies of Positive Test reports and the Company and any of its agents will use best efforts not to share the results with others without the individual’s consent except as follows: in connection with grievance/complaint processing or arbitration, administrative or judicial proceedings to which the report may be relevant; to a substance abuse treatment facility and/or professional for the purpose of evaluation or treatment of the individual; on a need-to-know basis internally; or as otherwise required by law.

**Required Employee Notification:**

An Employee whose job duties include the use of machinery and/or operation of vehicles or other equipment and who takes a prescription or over-the-counter medication that contains a cautionary label regarding the use or operation of machinery or vehicles must notify his or her Supervisor or Manager or other appropriate Company personnel before commencing work. If an Employee fails to notify and the Company confirms use of such medication (including confirmation by testing as authorized by this policy) such failure to provide notification is subject to disciplinary action, up to and including termination.
Resources for Addressing Workplace Drug/Alcohol Issues

Employee Assistance Program (EAP): Employees with chemical dependency concerns are strongly encouraged to seek assistance before dependency becomes a workplace issue. The company’s EAP provides access to resources for substance abuse counseling and treatment. Contact with EAP is confidential, except that the Company may require confirmation that the Employee is meeting EAP participation requirements when formally referred to EAP as part of a corrective action plan. Although voluntary use of EAP resources is strongly encouraged, it will not excuse any violation of this policy or other failure to satisfy job expectations.

Responsibilities

Employees: are responsible for complying with this policy and for cooperating with any testing or investigation conducted in support of this policy. An Employee who becomes aware of a violation of this policy should report the matter to a Supervisor, Manager, Human Resources, or the company hotline.

Human Resources: interprets, administers and coordinates communication relating to the policy, and develops procedures for its implementation.

Supervisors and Managers: are responsible for the day-to-day implementation of this policy.

Law Department: monitors legal requirements affecting drug/alcohol use and testing and provides legal advice and counsel.
